Workshop about security on the internet with Dr. Leo Hemetsberger

Published in Activities in Austria Be the first to comment!

On monday afternoon Dr. Leo Hemetsberger invited us for an interesting lecture about security on the internet. Besides the results of his own research Hemetsberger gave us a new view on the internet and it's long time memory. "The internet will never forget" is one of the sentences which we will remember. The students listened interested and worked in smaller groups with questions about there own internet habits. What do we have to think of when we are leaving our personal footprint on the internet, what is important to know about copyrights when we use pictures from the internet and how can we protect our personal information? This were two of the questions the students were first discussing and then presenting.

Thank you Mr. Hemetsberger for enlightening us about a very important topic!

Fridagymnasiet i EU

Internationellt utbyte

Fem träffar under två år för Frida-elever

Fyra elever i Fridagymnasiet åker till Österrike som del i ett utbytesprogram inom EU. Det ska handla om IT-användandet inom de deltagande länderna och ett utbyte av erfarenheter. – Jag ser fram emot att sätta mig in i de här frågorna lite mera och att träffa folk från andra kulturer, säger eleven Malin Hoffman.

VÄNERSBORG. 7 december reser de fyra studenterna från Fridagymnasiet till Österrike för att träffa elever där under en vecka. De har ett digert program framför sig med bland annat workshops.

SÄKER IT. Fridagymnasiet i Vänersborg deltar i ett internationellt projekt Säkert internet tillsammans med skolor från Grekland, Polen, Österrike och Norge. Från vänster eleverna Carl Österbrand, Per Isberg, Elin Andersson och Malin Hoffman. Bakom står lärarna Fredrik Lidén och Elin Hoffman.
