

# Task: Presentation

## Description of the task

The goal for this task is to prepare a presentation that each one of you will participate in. You will have to find one picture per person that somehow is representative to you; your interests, your family, the place where you live or something else that tells something important about who you are. The person who will describe will of course have to interview the other person to be able to prepare what to say.

## Result

You will tell one other work group about the members of your group, and in turn listen to their presentation. Since you are five in each group, you must let person 1 present person 2, who in turn will present person 3, and so on, according to the scheme below. Each person should use approximately one minute for his/her presentation.

## Resources

You can find pictures on the internet, using any kind of search engine. Choose any one you like. Since this is not going to be published you don't have to consider property rights.

You may use the computer of the Swedish student as well as an additional computer supplied by the Swedish teachers. Or maybe you have a mobile phone you can use. Put all pictures on one computer so that the switching between pictures is easy manageable.

## Time limits

You will have 30 minutes to prepare. The mutual presentation held by two work groups will take a little more than ten minutes, but not much more.

*Google away!*
